PROFESSIONAL PROFILE

Software engineer specialized in Backend development, with comprehensive competencies in Frontend, system design, and end-to-end project management. I stand out by avoiding *Low-Code*, prioritizing native development from scratch to build scalable, high-performance, and secure solutions. My technical foundation combines the rigor of memory management in C (42 Methodology) with advanced architectures in Java and PHP 8. Accustomed to solving complex business logic problems (ERP systems, fleet management, Open Data APIs) while operating 100% in Linux environments.

TECHNICAL SKILLS

Engineering & Backend: Java 21 (OOP, Virtual Threads, JNI), PHP 8.x (Native Architecture), C (Algorithms, Memory Management).

Applied Artificial Intelligence: Effective use of generative AI for development optimization. Solid knowledge of RAG architectures and LLM mechanics.

Local AI Deployment: Programming, configuration, and execution of AI models on local hardware (Ollama), ensuring total data privacy.

Machine Learning R&D: Personal research and practical experimentation with the creation of custom RAG systems and model adaptation techniques (Fine-Tuning).

Systems, Networks & Cybersecurity: Linux environments (Bash, Arch).

Frontend, UI/UX & Web Design: JavaScript (Vanilla, GSAP), Tailwind CSS, Figma (UI design, wireframing, and prototyping). REST API integration. Basic knowledge of React 19, TypeScript, and Vite.

Databases: MySQL 8, MariaDB, SQLite. Complex relational model design.

Tools & Methodologies: Git, GitHub, continuous integration/deployment (CI/CD) pipelines, and familiarity with agile methodologies and task management (Jira, Trello, Scrum).

PROFESSIONAL IT EXPERIENCE

Software Engineer Jun. 2026 – Present
HORION CASTILLO INGENIERIA INFORMATICA SL Bizkaia (Remote)

- Development of core modules for **Hori3n Enterprise** (proprietary ERP) implementing a scalable multi-tenant PHP architecture.
- Design of custom MVC routing, binary *output buffering* management, and advanced data persistence systems.
- Creation of an integrated outbox module featuring log history, direct database file downloads, and automatic attachment forwarding.
- Refactoring and maintenance of legacy interfaces in Vanilla JS using MooTools.

Java Developer (Freelance) May. 2026 – Jun. 2026
City Council of Bermeo Bermeo, Bizkaia

- Engineering and programming of an *End-to-End* Lost Property Management System executed under an agile methodology (15-day sprint).
- Development of a desktop application in **Swing/JavaFX** targeted at administrative staff and an interactive web portal for citizen queries.
- High-availability architecture: Server-side SQL database with local backup persistence clustering and automated backup scheduling.

Full Stack Web Developer (Freelance)

Independent Initiatives

Jan. 2025 – Jun. 2026

Bilbao, Bizkaia

- **Zalbi Aisia:** Native CMS architecture featuring Custom Post Types (CPTs), asynchronous taxonomic filtering, and client-tailored GEO/SEO strategies.
- **yeraygarrido.dev:** High-performance Single Page Application (SPA) in React 19 (100/100 Lighthouse score), developed as a personal technical portfolio.
- **archive.yeraygarrido.dev:** Custom web application with exclusive UI/UX design and a custom PHP backend administration panel for a photography portfolio.

Web Administrator and Plugin Developer (Internship)

GLOCALIUM SERVICES SL

Apr. 2025 – Jun. 2025

Bilbao, Bizkaia

- Backend extension engineering in PHP: programming a CSV export engine and a secure database persistence system in MySQL.
- Web infrastructure management: deployment automation, preventive cybersecurity audits, and UI prototyping in Figma.

ENGINEERING & FEATURED PROJECTS

- **Open Data Ecosystem (BizkaiBus+ / Metro+):** Real-time predictive mobility PWA. Automated pre-compilation of GTFS data into local **SQLite** (*zero-load* server architecture) merging live SIRI-VM/SIRI-SX data streams. SPA user interface developed in Vanilla JS, PHP 8, and Leaflet.
- **GastroAccess Euskadi:** SPA (React, TypeScript, Vite) consuming Open Data Euskadi APIs via custom scoring algorithms to evaluate real-world accessibility in the hospitality sector.

ACADEMIC BACKGROUND & CERTIFICATIONS

Higher Technician in Web Application Development (Dual VET)

CIFP Zornotza LHII

2024 – 2027

Amorebieta-Etxano

Programming Piscine & Core Curriculum (C, Algorithms, Linux OS)

42 Urduliz (Telefónica Foundation)

2022 – 2023

Bizkaia

Professional Certificate Level 3 (Web Development)

Fundación EDE

2021 – 2022

Bilbao Average Grade: 9.0/10 (590 hrs).

Additional Certifications: Cybersecurity and Ethical Hacking (BIG School, 2026) — Advanced SEO & GEO (Webpositer, 2026).

LANGUAGES & SOFT SKILLS

Languages: Basque (Native Competence) — Spanish (Native Competence) — English (Fluent competence).

Soft Skills: Highly decisive under pressure when handling critical operational incidents in real time (forged through prior experience in logistics security). Analytical mindset and capability for autonomous, accelerated technological learning.
