Machine Readable CV (XML API): yeraygarrido.dev/cv.xml

PROFESSIONAL SUMMARY

Software engineer specializing in Backend development, with strong competencies in Frontend, system design, and end-to-end project management. My technical foundation blends the rigor of low-level memory management in C (42 Methodology) with modern architectures in Java and PHP 8. Experienced in solving complex business logic challenges (ERPs, fleet management systems, Open Data APIs), operating proficiently in Linux environments.

TECHNICAL SKILLS

Engineering & Backend: Java 21, PHP 8.x, C (Algorithms, Memory Management).

Applied Artificial Intelligence: Effective use of Generative AI for development workflow optimization. Solid knowledge of RAG architectures and LLM internals.

Local AI Deployment: Programming, configuring, and running AI models on local hardware (Ollama), ensuring complete data privacy.

Machine Learning R&D: Independent research and hands-on experimentation with custom RAG systems and model adaptation techniques (Fine-Tuning).

Systems, Networks & Cybersecurity: Linux Environments.

Frontend, UI/UX & Web Design: JavaScript (Vanilla), Figma (UI design, wireframing, and prototyping). REST API integration. Working knowledge of React 19 and TypeScript.

Databases: MySQL 8, MariaDB, SQLite.

Tools & Methodologies: Git, GitHub, Continuous Integration/Continuous Deployment (CI/CD) workflows, and familiarity with Agile methodologies and task management (Jira, Trello, Scrum).

PROFESSIONAL IT EXPERIENCE

Software Engineer **Jun. 2026 – Present**
HORION CASTILLO INGENIERIA INFORMATICA SL *Bizkaia (Remote)*

- Core module engineering for **Horión Enterprise** (proprietary ERP) implementing a scalable multi-tenant PHP architecture.
- Custom MVC routing design, binary *output buffering* management, and advanced data persistence systems.
- Built a comprehensive outbox module with audit logs, direct database downloads, and automated attachment resending.
- Refactoring and maintenance of legacy user interfaces built with Vanilla JS and MooTools.

Java Developer (Freelance) **May 2026 – Jun. 2026**
Bermeo Town Hall (Ayuntamiento de Bermeo) *Bermeo, Bizkaia*

- Engineering and development of an *End-to-End* Lost Property Management System executed using agile methodology (15-day sprint).
- Developed a **Swing/JavaFX** desktop application for administrative staff alongside an interactive citizen-facing web portal.
- High-availability architecture: Remote SQL database with a local fallback persistence cluster and automated backup routines.

Full Stack Web Developer (Freelance) **Jan. 2025 – Jun. 2026**
Independent Projects *Bilbao, Bizkaia*

- **Zalbi Aisia:** Native CMS architecture featuring Custom Post Types (CPTs), asynchronous taxonomic filtering, and tailored GEO/SEO strategies.
- **yeraygarrido.dev:** High-performance web application built with React 19, serving as a technical personal portfolio.

- **archive.yeraygarrido.dev:** Custom web application featuring proprietary UI/UX design and a bespoke PHP administration backend for a photography portfolio.

Web Administrator & Plugin Developer **Apr. 2025 – Jun. 2025**
GLOCALIUM SERVICES SL *Bilbao, Bizkaia*

- PHP backend extension engineering: implemented a CSV export engine and a secure MySQL database persistence layer.
- Web infrastructure management: deployment automation, preventative cybersecurity audits, and UI prototype design in Figma.

EDUCATION & QUALIFICATIONS

Higher Technician in Web Application Development (Dual VET) **2024 – 2027**
CIFP Zornotza LHII *Amorebieta-Etxano*

Programming Piscine & Common Core (C, Algorithms, Linux OS) **2022 – 2023**
42 Urduliz (Fundación Telefónica) *Bizkaia*

Level 3 Certificate of Higher Professional Studies (Web Development) **2021 – 2022**
Fundación EDE *Bilbao Grade point average: 9.0/10 (590 hours).*

Additional Certifications: Cybersecurity & Ethical Hacking (BIG School, 2026) | Advanced SEO & GEO (Webpositer, 2026).

KEY ENGINEERING PROJECTS

- **Open Data Mobility Ecosystem (BizkaiBus+ / Metro+):** Real-time predictive mobility PWA. Automated pre-compilation of GTFS feeds to local **SQLite** storage with daily updates. Built using Vanilla JS, PHP 8, and Leaflet.
- **GastroAccess Euskadi:** SPA (React, TypeScript, Vite) consuming Open Data Euskadi APIs via custom algorithms to evaluate real-world accessibility standards in hospitality.

LANGUAGES & KEY COMPETENCIES

Languages: Basque (Native) | Spanish (Native) | English (Professional Working Proficiency).

Soft Skills: Highly decisive in handling critical real-time operational incidents (honed in prior logistics security experience). Strong analytical mindset and rapid, autonomous technological learning capability.
